

99mm x 210mm  
DL Portrait Flyer

CERBERUS

**Useful information:**

- Create work using a CMYK colour mode
- Resolution should be at least 300dpi

If you are unsure on how to use these settings, then please don't hesitate to contact us direct.

***We're happy to help!***

 **Bleed Area:** The bleed area extends to 3mm from the edge of your finished document. This is the part we trim off and all images and colours that extend to this area will disappear from the final product.

 **Non Text Area:** Avoid putting any text at least 3mm from the edge of this area. Text placed here will run very close to the edge. Also avoid any borders around this area.

 **Trim Area:** This is the finished size. Anything placed outside this area will be trimmed.
